Interfolio

Reappointment, Promotion, Tenure (RPT)

Departmental User’s Guide

for

Krieger School of Arts and Sciences

&

Whiting School of Engineering
Introduction

Interfolio Review, Promotion and Tenure (RPT) is an online platform for carrying out formal faculty reviews in a shared governance context, built to help academic institutions ensure that these processes are transparent, equitable, efficient, and well-documented.

Homewood’s use of the solution is to replace all existing processes for appointing and promoting faculty at the rank of Associate Professor of the Practice, Professor of the Practices, Associate Teaching Professor, Teaching Professor, Associate Professor with tenure, and Full Professor with tenure thus, creating a consistent and unified process.

RPT is one module offered by Interfolio. JHU also uses another module called ‘Faculty Search.’ Users access both tools with the same URL for ease of use.

Purpose of this Guide

This guide was developed to:
1. Serve as a resource regarding the appointment and promotion process for Homewood faculty
2. Demonstrate how to use RPT
3. Provide information on how to obtain help with the software and the process

This guide provides supplemental information to the existing Homewood Academic Council appointment and promotion procedures documents that can be found on the Homewood Academic Council’s website.

Accessing RPT

Recommended Browsers
To make sure you have the best experience possible, Interfolio recommends Google Chrome (latest version), Mozilla Firefox (latest version), and Safari (latest version).

How to Log into RPT

Most users will access the system from an icon found under the Human Resources category ( ) from the myJH portal that will utilize Single Sign-On (SSO).

The icon will look like this:  

Alternatively, this link will log a user directly into the software, while using SSO.

Interfolio Dossier

Faculty at JHU are provided with an Interfolio Dossier Institutional level account. This is a free online account where faculty can curate their scholarly materials, request and receive confidential letters of recommendation, and store materials for use throughout their career. The Dossier Institution account includes the ability to share materials through Deliveries, in addition to document storage. If a faculty member leaves JHU, their Dossier Institution account will be converted to a free account (no loss of files, but no longer able to share documents via Deliveries for free). If you already have a Dossier account, you may wish to merge it with your JHU Interfolio account. More information about merging accounts can be found here.

RPT offers a quick start guide to Dossier on its website as well as information on managing a Dossier.

Dossier or RPT

When a user first logs into RPT, they may see the screen below, asking if they want to go to JHU (i.e. RPT) or Dossier:
In addition, the user can switch between the two accounts by switching as indicated below:

If a user also has a Faculty Search account (another Interfolio tool), the screen may look like the following once ‘Johns Hopkins University’ is selected:

**Departments Need to Request a Case be Created**

Department users will contact the Homewood Academic Council Administrator to request that a case be created for a faculty appointment or promotion. Once the case is created, the candidate will receive an email prompting them to upload their packet. Once their packet has been uploaded, the department will receive an email prompting them to begin work on the case.
Obtaining Help with RPT

The Academic Council Administrator (homewoodac@jhu.edu) is able to assist with questions about Homewood’s use of Interfolio’s RPT module.

Additionally, there are many help aids available on the Interfolio website and through JHU myLearning.

Interfolio Scholar Services is available to provide technical support by telephone Monday-Friday, 9am-6pm, EST at (877) 997-8807 or via email (help@interfolio.com).

Sample Case Screen Shots

1. When a case has been assigned, you will receive an email with a hyperlink for that case that will automatically open RPT.

2. Once you are reviewing the case in RPT, clicking on ‘Case Details’ will show you instructions and also provide a list of required documents with a button to add them:
3. Click on ‘Case Materials’ to add additional (optional) items to the case:

4. Click on ‘Send Case’ and select the next step in the workflow once all materials have been added to the case:
Workflows

Workflows allow cases to be moved forward and/or backward, as appropriate. Each workflow step can have its own instructions, members, and requirements.

As the case moves forward and/or backward, an email should be generated to the appropriate person(s) receiving the case; this email is free text so the person sending it can convey whatever information the sender deems is essential.
The Role of a Committee Manager

Managing a Case
Managing a case may include moving a case forward/backward, and ensuring that all materials have been properly uploaded and completed.

How to Search for Cases
When a user logs into RPT, they will see, by default, the cases that are assigned to them. However, users can also search for cases by typing any words that appear in the case (name of candidate, workflow name, etc) and clicking on the magnifying glass:

Additionally, there are filters that can be used to further refine the search:

The status values that appear will only include those in use in existing cases and is not indicative of the total values available for use in the system.

Helpful Hints
Bookmarks can be utilized to make a long document, such as a CV, more readable to committee members and viewers. Refer to RPT help for more information about bookmarks.

Screen Shots - Candidate View of a Case
The following screen shots will enable administrators to support faculty with questions about their view of a case.
When an administrator creates a case on behalf of a candidate in RPT, the system will send an email notification that a case has been created. The email will include a hyperlink that will take the candidate to their case within RPT.

The following is a sample email to a candidate. The highlighted text is where a custom message will appear, if provided:

![Sample Email](image)

The candidate will be directed to a page that lists the required documents, materials and forms, as well as due dates (if assigned), and instructions for assembling the candidate section of the case.

The candidate should follow the simple on-screen instructions to upload and/or drag and drop documents and complete forms. RPT accommodates many file types, including links to webpages, YouTube and Vimeo videos. The case page is updated as items are added so that it’s clear what has been submitted and what still needs to be attached.

RPT provides a page, which shows the completeness percentage of each packet as well as a preview option, which allows the candidate to see how their documents will appear once submitted. When a candidate is ready to submit a completed packet, the candidate should select “Review and Submit” to complete the process. At this point, the case will move forward to the next step in the review process and the candidate will no longer be able to upload or update materials.

RPT offers help to the candidate about the [candidate experience of a RPT case](#).
Overview - offers candidate what items are required/optional as well as graphic of how close case is to completion:

Packet View - offers candidate an expanded or collapsed view of the case, indicates if documents are unlocked (editable) or locked (not editable), offers a preview of the packet as a whole, and provides a button for candidate to submit case:

Message to Candidate when ‘Submit’ has been clicked:
Candidate view once a case has been submitted; the candidate can no longer edit the case but can view the materials:

Appendix B contains a list of frequently asked question and answers.
## Appendix A Interfolio Dictionary

The following terms are those most used in Interfolio:

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>Administrator</td>
<td>People identified to be allowed to initiate cases, create/modify templates and maintain the master data in the application</td>
</tr>
<tr>
<td>Bookshelf</td>
<td>A place in a workflow where no processing takes place; a case rests here until an administrator either pushes it forward or backward</td>
</tr>
<tr>
<td>Candidate</td>
<td>The person for whom a case is created</td>
</tr>
<tr>
<td>Case</td>
<td>Materials for an appointment are entered into an entity called a ‘case’; candidates, departments, administrators and committee managers can add content to a case depending upon the template on which the case is based</td>
</tr>
<tr>
<td>Committee Manager</td>
<td>Person in charge of a committee; has an elevated level of permissions from committee members; can add files to case; can communicate with the candidate and/or committee members; can move a case forward or backward; permission is established by an administrator</td>
</tr>
<tr>
<td>Committee Member</td>
<td>Person who is part of a committee for a specific case; has basic permissions; can read a case; can download a case (if allowed); can leave comments on the case (if allowed)</td>
</tr>
<tr>
<td>Template</td>
<td>A pre-defined set of business rules and documents on which a new case is developed; templates for SOM were built at the ‘School of Medicine’ unit level but the ability exists to develop templates at a more granular level if needed</td>
</tr>
<tr>
<td>Unit</td>
<td>An administrative unit is equivalent to a SOM department or division</td>
</tr>
<tr>
<td>Workflow</td>
<td>The progression of a case either forward or backward for continued processing</td>
</tr>
</tbody>
</table>
## Appendix B - Questions Frequently Asked by Candidates

<table>
<thead>
<tr>
<th>Question</th>
<th>Answer</th>
</tr>
</thead>
<tbody>
<tr>
<td>Is there a file size limit for my packet?</td>
<td>There’s no size limit for the packet, but there is a size limit per document. Files can be up to 100MB in size. During the upload process, RPT will convert all files to PDF format. If a file is too large, there are free websites, like smallpdf.com, that will condense it for you.</td>
</tr>
<tr>
<td>What types of files can I upload to my packet?</td>
<td>When adding a file to a section, you have the option to add a file from your computer, your Dossier account, or link to a webpage or a video hosted on YouTube or Vimeo.</td>
</tr>
<tr>
<td>Can I make changes to my packet after I submit?</td>
<td>The packet will “lock” upon submission. If you need to make any changes, you will need to reach out to your administrator.</td>
</tr>
<tr>
<td>I don’t see a “save” button in the packet. What if I need to finish uploading documents at a later time?</td>
<td>The system will auto save as you upload documents. Forms are the only sections of your packet that don’t auto save. You must complete all of the required questions in a form before you leave the page in order for your responses to save.</td>
</tr>
<tr>
<td>Can I rename a document once I’ve uploaded it to RPT?</td>
<td>Yes, see RPT product help for more information.</td>
</tr>
</tbody>
</table>
